

IST Home School

IST Home School will replace Dexter from this autumn term, 2024.

As a parent, you need to download the IST Home School app. You can do this by following one of these links:

[AppStore - IST Home School](#)

[GooglePlay - IST Home School](#)

Log-in to the app is then done with a mobile bank ID. If you do not have a mobile bank ID, contact the school for further information.

You need to self-change your phone number and email under the My Profile tab.

In the app, you as a parent will be able to register absences. It is sick leave that is registered. At the bottom of the home page there is a plus sign "**SKICKA IN**", where you choose which child and date it applies to. When registering, parents can state the reason for absence. A maximum of two days of absence can be registered. After that, parents need to actively go in and report sick again. This is part of the schools' strategic attendance work. This should not be confused with time off. When a student is to be on leave from school, e.g. dentist or travel, the parent needs to contact the student's mentor at the school to request leave.

At the bottom of the home page in the right corner is "**MENU**". Below that, you can choose a number of headings to take you to different information available in the app.

Schedule – the student's schedule

School year – the dates of the school year

Study plan – shows the student's subjects/courses and grades.

Meeting schedule (*samtalsbokning*) – here the mentor will show you times to book for different meetings.

Chat – Chat between teachers and parents.

Settings – can change language and remove notifications, among other things.

At the bottom of the app on the home page, under "**HÄNDELSER**", notifications will occur when teachers send information to parents, such as a Blog, request for meeting times, etc.

Its Learning

Schools will continue to use Its learning for subject planning. There, parents can download the app to take part in their or their children's subject plans and follow

KRAMFORS KOMMUN

the content of the subjects, assessment and information. Here you can read more about Its learning under related documents on Kramfors municipality's website: <https://www.kramfors.se/barn--utbildning/digital-pedagogisk-utveckling-i-skolan/itslearning.html>

You download the app according to the instructions at this link:

[AppStore - its learning guardians](#)

[GooglePlay - Its learning for guardians](#)

Tempus

If you have children in after-school (fritids) or preschool (förskola), Tempus is still used for attendance registration and schedule management. Read more about the content and access to Tempus on Kramfors municipality's website: <https://www.kramfors.se/barn--utbildning/forskola-och-barnomsorg/tempus.html>

In summary, parents need access to the following apps in order to be able to follow, register and be involved in their children's care and schooling in the best possible way.

IST Home School	Preschool class – Compulsory school – Adapted compulsory school – Upper secondary school – adapted upper secondary school
Its Learning	Preschool class – Compulsory school – Adapted compulsory school – Upper secondary school – Adapted upper secondary school – Participants in adult education and vocational education (gets their own login).
Tempus	Preschool and after-school care

If you have any questions, please contact your school.
